BUILD GREENER WITH ALLCASTLE HOMES

Our **Select Plus+ Upgrades** save money and help live your green dream

Now you can upgrade your home's comfort and energy efficiency with Allcastle Homes' Energy Savings Package.

Live more comfortably and keep your energy bills low with higher rated insulation. Ensure your EV is ready to drive with your garage charging station and reduce rising electricity bills with solar panels that power your home using the sun's renewable energy. You'll find a lot more to make you smile in this brochure and it could all be yours! Make your move today, upgrade to our Premier Plus+ Energy Savings Package and start living your green dream today!

Energy Saving Upgrades

1. DAIKIN AIR-CONDITIONING

Upgrade to a Daikin Superior Inverter fully ducted reverse-cycle air-conditioning system (home specific).

With innovative features, superior performance, and a trusted reputation, your Daikin Superior Inverter upgrade can provide precise reverse-cycle temperature control comfort – all year round. Your superior Air-Conditioning upgrade is fully ducted to quietly distribute air evenly throughout your entire home and deliver consistent comfort.

2. SOLAR SYSTEM

3.5kw Solar Systems, 8 X 440w Solar Panels & 3kw Standard Single Phase Inverter. Supplied & installed.

Power up your comfort and your savings with 8 x 440w Solar roof panels harnessing the sun's free energy. This upgrade allows you to enjoy year-round, emission-free electricity and even earn money by selling any surplus back to the grid. Masterfully installed on your roof, solar panels future-proof your home, increase your property's market value and contribute to a greener planet by reducing your carbon footprint.

3. EV CHARGER

Fully fitted 7kw Single Phase Charger with 4m Type Two lead in garage. Supplied, fitted & installed.

With a wall-mounted EV charger in your garage, you can move towards a greener future and unlock the power of electric driving. This level 2 charger is compatible with all major car brands – equivalent to a full charge overnight for most EVs. Convenient and efficient, this upgrade gives you control over your charging times and range.

Energy Saving Upgrades

GREAT ENERGY SAVINGS PACKAGE

4. INSULATION UPGRADE TO R5.0

Top Storey Trussed Roof Ceiling Insulation.

Most homes lose and gain substantial heat through ceilings, so insulation batts are essential to reducing energy bills and maintaining a comfortable indoor temperature year-round. And the higher the R-Value of the batt, the better it works. Manufactured from recycled glass, top-of-the-range R5.0 batts have millions of air pockets that trap air to keep your home cosy. They can help reduce your heating and cooling energy bills and contribute to a more energy-efficient and eco-friendly home.

5. ROOF SARKING

Provide sarking under roof tiles to help seal and insulate the home.

The importance of good quality roof sarking cannot be understated. It's a pliable membrane that sits directly under your roofing. Like a second protective skin, it enhances your ceiling insulation's efficiency, reduces draughts, and protects from storm-driven rain and dust. Roof sarking also minimises the risk of condensation.

6. WALL SARKING

Provide wall sarking to the exterior wall frame to seal and insulate the home.

Like roof sarking, wall sarking protects your home and helps you to live more comfortably. Wall sarking is a tough, weatherproof membrane that completely wraps your house frame. It helps make your home more comfortable by keeping it warmer in winter or cooler in summer.

7. HEAT PUMP HOT WATER

Provide highly energy efficient 250ltr heat pump H.W.S system.

Clean, green heat pump technology takes heat from the air, providing you with a constant supply of hot water. It's patented in-tank heating coil ensures maximum efficiency and minimal heat loss, while the fully insulated storage tank and robust refrigeration system enhance thermal efficiency. And with a large 250-litre tank, you can have reliable, cost-effective, energy-efficient hot water for the whole family.

8. THERMAL UPGRADES

Offer includes \$5,000 provisional allowance towards achieving 7-Star Energy Efficiency.

Every new house built in Australia must meet a minimum NatHERS 7-star energy efficiency rating. The good news is our Thermal Upgrade gives you \$5000 to help you comply. You can spend it on energy-efficient design elements such as optimal insulation, energy-efficient appliances, and extra solar panels. Collectively they can reduce your energy consumption and greenhouse gas emissions, resulting in a more sustainable and comfortable home.

Kitchen Upgrades

TECHNIKA®

9. KITCHEN APPLIANCES

Upgrade to Bellissimo by Technika 900mm Stainless Steel Under Benchtop Oven TB90FSS-5 900mm Technika cooktop H950SLTXFPRO with 1 x wok burner (5 burners in total) & Stainless Steel Microwave WD905-2 With Trim Kit.
